

ISABELLA BROCH

web developer

Dear Emma Lindgren,

Storytel is looking for someone with expertise in and a passion for frontend development. I am that someone.

I am graduating as a Web Developer, where I have learned how to create and manage web projects, focusing specifically on frontend tools.

I understand how important it is that sites are not only easy to use, but feel good to use. When I develop, I approach my work with the mindset of a user. Does it make sense? Do I want to use this again? I aim to make sure 'yes' is always the answer.

I enjoy staying up to date with the latest technologies. I can implement those technologies into websites and apps. While my primary focus is on HTML, CSS, Javascript, and related frameworks like React, I also like to understand things outside of my scope. It not only helps me consider my work from another perspective, it allows me to better understand where my colleagues are coming from when their focus is on design or on the backend.

I believe my skills and interests line up with Storytel's goal to create a service that enables reading anywhere with convenience. I can help create an exceptional experience not just for Storytel's customer base, but for my future colleagues too.

Please see my attached CV for further details. Thank you for your time and I look forward to hearing from you, Emma.

Kind regards,
Isabella Broch
